

TRAVEL CHARTER* - Le Périscope

1. Is it necessary or important to attend the event ?

If yes - please specify :

- How many people will the team need ?
- How will you get there ?
- What is the ratio between transportation time and length of stay ?
- Ratio of all available means of carbon-based transport

2. How many events will we be attending this year ? Which events are the most environmentally friendly ?

QUESTIONS	YES	NO
Is it necessary to participate in this event?		
Does the event help develop partnership or professional development opportunities in the region ?		
Will the event enable me to meet communities/organizations that are less accessible on the international scene ?		
Do the event organizers think about the environmental impact of their event ?		
Does the event last less than a day ?		
Is the destination accessible by train ?		
If the destination is accessible by train, does the journey take less than 10h ?		
If the destination is not accessible by train, are there direct flights ?		
Are these flights operated by low-cost companies? **While low-costs are often cheaper and serve cities outside the capital, which often make it possible to take a direct flight, they obviously raise ethical issues (working conditions, business model, etc.). They are less carbon- intensive because they are fuller and have no 1st class/business class.		
Is it possible to organize other meetings or participate in other events in the same area ?		
Have you discussed more responsible options with the organizers?		
Can you bring something to your local business or community through this event in terms of reciprocity?		
Does the chosen venue/city enable you to keep in touch with areas of cultural cooperation that would be excluded if we were to rely solely on their accessibility by more sustainable modes of transport ?		
Does the event offer opportunities to local communities that would not be available to them if it wasn't organized ?		
Have you organized an event at this location in the past year?		

If, after answering these questions, you have more than 60% orange answers, you may wish to consider attending the meeting online in a hybrid format¹ or re-evaluate the relevance of your trip/event¹, taking into account other aspects such as the number of participants, financial costs, etc.

*The Periscope travel charter is inspired by the On the Move network's decision-support tool, developed in collaboration with The Green Room.
